

Please complete the following questionnaire, which is part of our procurement selection process. All questions should be answered: yes, no, unsure, or not applicable.

POLICY

Does your organisation have a sustainability or environmental policy in place?

CERTIFICATIONS

Does your organisation or product(s) carry any sustainability certifications?

OPERATIONAL CARBON EMISSIONS

Does your organisation measure and manage its operational carbon emissions?

Will the product or service being provided generate ongoing emissions or have an ongoing energy demand?

Does your organisation offset part or all of your operational carbon emissions?

EMBODIED CARBON EMISSIONS

Has the embodied carbon emissions of your product(s) been measured through life cycle assessment?

Are any steps being taken to reduce embodied carbon emissions of your product(s)?

WATER

Does your organisation measure and manage water consumption?

Do your operations or products produce trade waste or water pollutants?

Are steps being taken to manage your organisation's water use and impact on waterways?

TRAVEL CARBON EMISSIONS

Does your organisation measure and manage emissions from company travel?

Does your organisation have low or zero emission transport initiatives in place?

NATURAL ECOLOGIES

Do your products or operations impact any areas of high biological value?

Do your operations generate hazardous or non-bio-degradable waste?

HUMAN HEALTH

Do your products or services release any volatile organic compounds, formaldehyde, carcinogens or other chemicals detrimental to human or animal health?

SOCIAL VALUE

Are your employees and any self-employed contractors paid a living wage?

Would you consider your organisation to be local or independent?

Does your organisation have a diversity and inclusion policy?

WHOLE LIFE VALUE

Are your products designed for long life (greater than 10 years) and for ease of repair?

Does your organisation have an end-of-life returns program or is your product designed with a second life in mind?

Do your products or services make use of post-consumer recycled materials?

Does your organisation have a program to minimise packaging and ensure packaging items are recyclable?
